### Chapter 1 - South Carolina River Systems Study Guide

- Locate and label the 4 main river systems on a map of South Carolina. (Text Message: PD → SNT → ED → SAV)

1. Pee Dee River System
2. Santee River System
3. Edisto River System
4. Savannah River System

- Locate and label South Carolina, Georgia, and North Carolina on a map of the United States.

- Identify the Atlantic Ocean on a map of the United States.
- Identify the map symbols for a city and a state capital
- Name our city and state capital
- Provide pertinent information about the various river systems and lakes in our state.
  1. The Santee River System is the largest river system in our state because it has the most rivers flowing into the system.
  2. The Savannah River System forms the border between SC and GA.
  3. The Savannah River is the longest river in SC.
  4. The Edisto River System is the smallest river system in SC and is the only system that is fully contained in our state.
  5. All of the other river systems begin outside of our state.
  6. All of the SC River Systems flow into the Atlantic Ocean.
  7. All of the major lakes in South Carolina are man-made; they were made by damming the large rivers in order to produce electricity for our state.
  8. The largest lake in SC is Lake Marion.
